Metaphors in Mind:
Transformation through Symbolic Modelling
James Lawley and Penny Tompkins

ORIGINAL INDEX

Page numbers in e-books vary according to user settings and type of e-reader. They do not correspond to the page numbers in the index of the original printed book. We therefore have not included an index in this addition. However, with over 500 entries our index provides a detailed summary of the book's content. Researchers who want to use the original index with their e-readers search facility can use the list below

Addiction
Address  See also Symbol
Allport, Tom
Ambiguity
'And'  See also Syntax
Andreas, Steve and Connirae
Applications:
  anger management
  classroom respect
  clinical rapport
  computer training
  corporate metaphors
  couples and families
  a doctor's shorthand
  forgiveness
  listening
  maths problem
  Meta-Aromatherapy
  modelling
  motivation to publish
  moving sound
  public speaking
  reaching agreement
  recruitment
  Refocussing
  spirituality
  symptom description
'As'  See also Syntax
Assignments for clients

and trance
vocal qualities
Clean Language Practice Group
Clean questions:
'And can?
And does X have a size or shape?
And how do you know?
And how far?
And how many?
And how old?
And is X inside or outside?
And is X the same or different to Y?
And is there anything else?
And is there a relationship between X and Y?
And that's X like what?
And then what happens?
And what's between X and Y?
And what could X be wearing?
And what happens just before X?
And what happens next?
And what kind of?
And what would X like to have happen?
And when X what happens to Y?
And where are you drawn to?
And where are you going?
And where could X come from?
And where is X X-ing from?
And where is?
And whereabouts?
And which direction?
And would X be interested in going to Y?
And would Y like?
